

Autodesk®
RealDWG™

Get real.

Autodesk®

The RealDWG™ 2009 software library provides the highest level of DWG compatibility with Autodesk products, making design collaboration seamless.

RealDWG 2009

- Helps ensure the highest level of confidence when sharing design data
- Always has the most up-to-date format produced by AutoCAD software and AutoCAD-based products, including read/write support for the AutoCAD 2000, 2004, and 2007 file formats
- Has built-in object enablers for seamless interpretation of custom objects
- Provides read/write support for DXF technology Release 12 and later
- Offers the highest reliability and fidelity on the market

Deliver your products with the latest DWG™ technology available from Autodesk and get your products to market faster. The RealDWG 2009 developer toolkit gives you and your customers a competitive edge and the confidence that comes with having applications built with 100 percent DWG read/write capability.

RealDWG 2009 Benefits

The RealDWG 2009 software library enables C++ and .NET developers to read and write DWG and DXF™ files created using AutoCAD® software. RealDWG 2009 provides compatibility with DWG files created using AutoCAD software, including read/write support for the AutoCAD® R14, 2000, 2000i, 2002, 2004, 2005, 2006, 2007, and 2008 releases and the drawing enhancements now available with AutoCAD. RealDWG is also used internally by Autodesk to provide DWG support in non-AutoCAD-based applications such as Autodesk® VIZ, Revit®, and Autodesk® Inventor™ software products.

RealDWG 2009 software is licensed technology and does not impose a user interface. RealDWG provides the framework to support in-memory file operations and custom objects. Unlike competitive products, that contain reverse-engineered DWG formats, only RealDWG provides the native DWG libraries found in AutoCAD software.

RealDWG 2009 Pricing

Pricing and licensing terms make RealDWG 2009 software an attractive development foundation for millions of users who create and share design data seamlessly with extended project teams in the manufacturing, infrastructure, building, government, and utilities sectors.

A one-year distribution license fee of US\$5,000 includes access to any software updates and the right to distribute one application using RealDWG 2009 in that time frame. After that, the annual distribution license fee is \$2,500. Companies also can join the Autodesk Developer Network to receive development support for RealDWG 2009 software.
