

A Better Way to Learn!

The Importance of Learning

An investment in education leads to key improvements in capabilities, capacity and job performance, reduces error rates and project completion time. Education plays a critical role in maximizing job performance and satisfaction throughout one's career.

What is CAD Club Academy?

Advanced Solutions' CAD Club Academy is an education subscription program combining Advanced Solutions' best education offerings including access to more than 100 live online classes, on-demand courses, continuing education credits, and many more exclusive benefits for the duration of the membership.

Our Company needs a variety of learning options, our users have various experience levels...

CAD Club Academy offers access to more than 100 Autodesk Certified courses across multiple disciplines and levels. Class sizes are small so everyone gets the most out of their class.

It's hard to get away from work, I need a flexible learning schedule...

Our flexible course schedule allows you to select what to learn and when with classes being offered mornings, afternoons, and some evenings. We also have on-demand classes giving you complete flexibility with your learning schedule.

Training is expensive...

CAD Club Academy is one of the most affordable education programs of its kind on the market today. For the same price as most 5-day courses, you can enjoy a full year of unlimited access to learning. Advanced Solutions manuals are included at no extra cost, and we provide additional discounts on 3rd party manuals.

What if I need extra help?

Start your membership with our live Kick-Off orientation to learn the full benefits of the program. In addition, we offer extra class help at no cost through our Office Hours and you have access to our library of Tech Talk learning sessions.

Is this right
for me?

Multiple Ways to Learn

Bring the classroom to you. PILOT classes (professional instructor live online training) are live instructor-led classes you can take from the convenience of your computer.
