ASI BIM Assist Installation Guide

- 1. Download the BIM Assist installation package from the link that was provided to you and extract the installer within the zip file.
- 2. BIM Assist 2012/2013 requires Microsoft .net 3.5. If it does not exist on your machine, you should install it from Microsoft.com or your original Windows installation CD.
- 3. Run the installer and you will be presented with the license agreement. You must accept this agreement to continue, then click the Install button. If you are prompted for administrator permissions to continue, under Windows Vista or Windows 7, you must allow the installation for it to proceed.

- 2. Once the product is licensed, the status message will change to "Licensed" and the background color will change from red to green. Press the Close button to continue to the license agreement.
- 3. Once you have accepted the license agreement, you are now ready to load a project file and use BIM Assist for the first time.
- 4. The BIM Assist menu will automatically be added to your "Add-Ins" ribbon.
