

## Join the Club

*An investment in training leads to key improvements in capabilities, capacity, and job performance while reducing labor costs, error rates, and project completion time.*

## WHAT IS CAD CLUB?

### Subscription Learning

VIA CAD CLUB

Advanced Solutions CAD Club is an all-inclusive, live-online, training subscription membership. It provides access to more than 90 live instructor led online courses. Platinum and Enterprise levels gain additional access to a robust library of on-demand sessions.

## MEMBERSHIP PLANS

We offer three membership plans to meet your specific needs: CAD Club Basic, CAD Club Platinum, and CAD Club Enterprise.

**CAD Club Basic**, an Individual level membership, is assigned to one employee within the company.

**CAD Club Platinum**, an Individual level membership, offering additional features for the student wishing to optimize their training.

**CAD Club Enterprise**, membership provides unlimited users within the organization unlimited access to the program.

## BENEFITS

### Kick-Off Meetings

On-boarding sessions to increase your level of success in the CAD Club program by highlighting all of the aspects of being a CAD Club Member.

- Learn what to expect from your membership and become immersed in the CAD Club community to get started on the right path to the ideal education goals.

### Structured Learning Paths

Paths are industry specific, offering recommend courses to develop an optimal skillset. Advanced Solutions offers a wide range of training for all industries, and courses for every experience level.

### Continuing Education Credits

Advanced Solutions eLearn & Improve™ and PILOT™ are accredited for Continuing Education Units (CEUs), as well as corresponding Professional Development Hours (PDHs).

### Tech Talks

CAD Club Tech Talks are “lunch and learn” webinars hosted by our PILOT course instructors, they cover a wide variety of topics for the architecture, engineering, construction, infrastructure, and manufacturing industries.

### CAD Club Office Hours

Students can meet with our instructors to discuss class material or other related questions regarding the software.

- Course-related discussions include asking for extra help and seeking clarification on material presented in class.

# A Better Way to Learn

*Why you should join the club*

***Our company needs a variety of training options, our users have various experience levels...***

Access more than 90 Autodesk Certified PILOT classes across multiple disciplines and levels. Class sizes are small so everyone gets the most out of their class.

***It's hard to get away from work, I need a flexible training schedule...***

We have several class time offerings, morning, afternoon, and some evening classes. If those don't work for you, check out our eLearn & Improve On-Demand Training.

***Training is expensive...***

CAD Club is cost-effective – a full year of training for the cost of a 5-day course. With CAD Club you also get exclusive discounts on certified courseware and certification exams. Additionally, our courses can help you meet your Continuing Education requirements.

***I don't know what classes I need to take and 90 classes is a lot to filter through...***

We offer industry specific learning Paths created by our instructors. All learning paths include prep, core, and elective classes to help you navigate your training.

***What if I need extra help?***

Start your membership with our Live Kick-Off Meetings. Join the Education Specialist Manager to learn all of the benefits of CAD Club.

We also provide extra help through our CAD Club office hours and monthly Tech Talk lunch and learns.

## HOW CAD CLUB WORKS

CAD Club provides you with unlimited access to live-online and on-demand training options for 12 months, as well as providing you with exclusive membership in the CAD Club Community.

As an Autodesk Authorized Training Center, Advanced Solutions offers a wide range of Autodesk certified training for every industry, from courses for those just starting out with software to those users with more experience seeking to update skills.

### MULTIPLE WAYS TO LEARN

#### Live-Instructor Led

[VIA PILOT](#)

PILOT classes (Professional Instructor Live Online Training) are live instructor-led classes you can take from the convenience of your computer.

#### On-Demand

[VIA E-LEARN & IMPROVE](#)

eLearn & Improve offers on-line training at the touch of a button, allowing you access to self-guided courses from anywhere at anytime.
